DIV. OF OIL, GAS & MINING

Mr. Western

Please accept our application for bond release in regards to permit S/17/0035 Gold Queen-Million Dollar Gulch area in the Henry Mountains, southern Utah.

We have decided to close this permitted area and have groomed and smoothed the area with excavation equipments. We are working with BLM and biologists to obtain proper seed programs for the site at this elevation and will seed the sloped areas once we have a small snowfall on the site later this fall. We were active in the mine site with crews earlier in the year but BLM notified our crews that the permit was not satisfactory as a small mine but only an exploration area with a limit of 1,000 tons of ore extraction available. We had to shut down operations at the site due to this decision.

We hope this procedure will take care of the citation issued concerning the bond escalation for the site. We see no need to escalate a bond on a permit that has been approved for many years as a small mine, that we cannot actually extract mine grade ore from.

We understand a time period is needed for re-vegetation at the site, and would simply like to transfer reclamation bond funds to our May Day Mill permit once the State and BLM are satisfied of full reclamation of the arid permit area at Million Dollar Gulch.

We have also updated all contact information at your office and BLM, also Department of commerce with the State of Utah at present. We do not know why certified mail was returned to your office as the Postal service mail box was not lost or delinquent during that time period.

Thank you for responding with any questions you may have either via mail, email, or phone numbers which have been provided both above and in formal format at your office in file.

Thank you,
